Professional Summary

Cyber Security undergraduate with strong interest in software development and full-stack web applications. Hands-on experience in building interactive web interfaces, integrating hardware systems with software platforms, and developing real-time monitoring dashboards for industrial and institutional use cases.

Education

B.E Cyber Security Sree Sakthi Engineering College, Karamadai	2023 – 2027 CGPA: 7.85
Higher Secondary Education Panimalar Higher Secondary School	2016 – 2023 Percentage: 75%

Technical Skills

Programming Languages: Python, C++, Java
Web Technologies: HTML, CSS, JavaScript, TypeScript, React
Tools: VS Code, Cursor, GitHub
Databases: MongoDB, SQL, Firebase

Projects

Gate In–Gate Out Automation System (Face Recognition Based)

- Developed the frontend interface for the gate management system used by Admin and Management to monitor real-time entry and exit logs of staff and students.
- Worked with the hardware integration team to connect the facial recognition device with the web system for automated attendance logging and gate monitoring.
- Implemented UI components to display real-time logs, user details, and attendance records from the backend database.
- Supported integration of IVR alerts, SMS notifications, and a mobile application for hostel outing approvals with multi-level authorization workflow.

Shot Sense – Industry Project (Real-Time PLC Dashboard System)

- Configured and managed the network communication between PLC devices and the monitoring dashboard for reliable real-time data transfer.
- Assisted in establishing stable data connectivity to stream machine parameters from the shot blasting machine to the backend system.
- Collaborated with the development team to ensure continuous data flow and real-time visualization of production metrics.

Virtual Mouse Using Hand Gestures

- Developed a virtual mouse system using Python that allows users to control cursor movement through hand gestures captured via webcam.
- Implemented computer vision techniques to detect hand landmarks and translate gestures into cursor movement and click actions.

Mediguard – Patient Monitoring Website

- Developed a hospital monitoring website that allows patient health status to be monitored remotely without physically visiting hospital rooms.
- Enabled real-time patient updates and centralized monitoring for improved hospital workflow efficiency.

File Integrity Checker Website

- Developed a website-based file integrity checker that detects file modifications.
- Implemented hash comparison mechanisms to notify users if a file has been altered or tampered with.

Achievements

- Published a research paper titled “Neuro Crime” at Saranathan College, Trichy.
- Secured 1st Prize at SNS Engineering College, Coimbatore in a Artathon/Event.
- Secured 3rd Prize at PPG College, Coimbatore in a Hackathon.
- Secured 1st Prize in Vibe Code Competition at PPG College, Coimbatore for developing an innovative website.
- Won 2nd Prize at National Level Product Launch for Mediguard – Patient Monitoring Website at Sri Ramakrishna College.
