

EMAYA M

AIR CARGO EXECUTIVE | AIRLINE GROUND SERVICES | AIRPORT GROUND OPERATIONS
EXECUTIVE

Phone: +91 8925373609 | emayamanickam19@gmail.com | linkedin.com/in/emayamanickam

CAREER OBJECTIVE

Aviation graduate with a Bachelor of Science in Aviation and knowledge of airport ground operations, air cargo handling, flight operations, aviation safety, air traffic management, aircraft systems, navigation, meteorology, and aviation regulations. Seeking an entry-level opportunity as an **Air Cargo Executive**, in **Airline Ground Services**, or as an **Airport Ground Operations Executive** to apply strong communication, teamwork, analytical problem-solving, safety awareness, and operational coordination skills while contributing to safe, efficient, compliant, and customer-focused aviation operations.

EDUCATION

B.Sc. Aviation

2024–2025

ASET College of Science and Technology, Chennai

CORE COMPETENCIES

Airport Ground Operations | Air Cargo Handling | Airline Ground Services | Ramp Operations Awareness | Flight Operations | Aviation Safety | Air Traffic Management | Aircraft Systems | Navigation | Aviation Meteorology | Aviation Regulations | IATA Regulations | Dangerous Goods Awareness | Crisis Management | Operational Coordination | Communication | Teamwork | Problem Solving

ACADEMIC PROJECTS

Fabrication of Firefighting Robot for Airport Ramp Area

- Developed a miniature automated firefighting robot prototype for airport ramp environments to detect fire using sensors and support rapid response.
- Integrated sensors, microcontrollers, and actuators to simulate a practical automated firefighting scenario.
- Focused on rapid response and effective firefighting measures to minimize the operational impact of ramp-area fire incidents.

Mini Hovercraft Design & Optimization

- Designed, developed, and validated a dual-terrain mini hovercraft prototype using an air-cushion propulsion system.
- Demonstrated maneuverability, terrain adaptability, stability, and load-bearing performance across diverse operating surfaces.
- Implemented a 2.4 GHz wireless remote-control system for accurate navigation and achieved 10 minutes of continuous operation.

CERTIFICATIONS & INDUSTRY EXPOSURE

- Artificial Intelligence Program – IBM SkillsBuild & Magic Bus India Foundation:** Gained foundational knowledge of AI concepts along with communication, personality development, and problem-solving skills.
- Air Traffic Control (ATC) Tower Visit – Hosur Airport under AAI:** Gained practical exposure to live ATC operations, communication protocols, radar surveillance systems, controller coordination, and airspace management.
